

Richard Jobson

BA Hons Dip (dist) Arch RIBA
Director

Previously with Whitbybird and a director of Architecture PLB, Richard is a founder Director of Design Engine.

Richard headed up the Bridges Team at Whitbybird from 1997 until 2000, winning numerous national and international competitions. The Shanks Millennium Bridge received 'The building of the Year' award in 2002.

He is currently responsible for numerous Design Engine projects, including the recently completed new British Embassy in Yemen, The University Centre for Winchester University and a low-energy office park in Southampton. The most recent commission is for a major redevelopment of Oxford Brookes University which includes the construction of a new Learning Resource Centre, a Student Union and Open Access Facility.

Richard's commitment to low and free energy principles ensures that Design Engine Architects work closely with other specialist consultants in realising the environmental aspirations of the brief in realistic yet imaginative ways.
